Ecology and Evolutionary Biology Doctoral Program

SUBJECT: Waiver of GRE requirement for applications to the EEBL Doctoral Program

The Ecology and Evolutionary Biology Doctoral Program requests to remove the requirement for GRE scores for all applications to our Doctoral Program. Recent studies have demonstrated that GRE scores are not predictive of future success for graduate students. The test is also cost prohibitive for some groups of students, including for many foreign applicants. As a consequence, graduate programs across the country are dropping the requirement for GRE scores for graduate applications. Recently the EEBL Executive Committee voted unanimously to drop this requirement from our program. Our request to drop the requirement for GRE scores will allow the program to match current trends and compete more effectively with peer institutions for prospective doctoral students. It will also force us to evaluate our applicants in a more thorough and comprehensive fashion.

The program that would no longer require the GRE would be the Ecology and Evolutionary Biology PhD Program.
