

Compass Reporting Argos Reporting Tool

Presented by: Josh Radnitzer & Terry Krolczyk
Enterprise Information Systems
eis-reports@tamu.edu

Business Intelligence

Software applications used to analyze an

organization's raw data

What is Argos?

- Adhoc
- Report
- Generation
- Output
- Solution

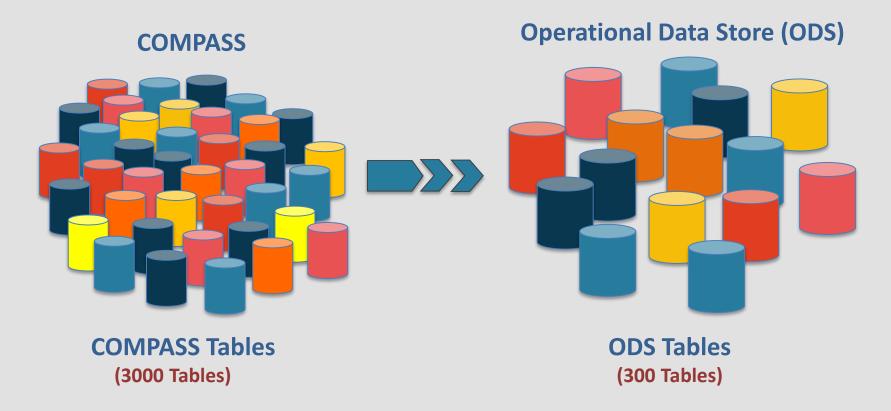

Why use Argos?

COMPASS vs. Operational Data Store

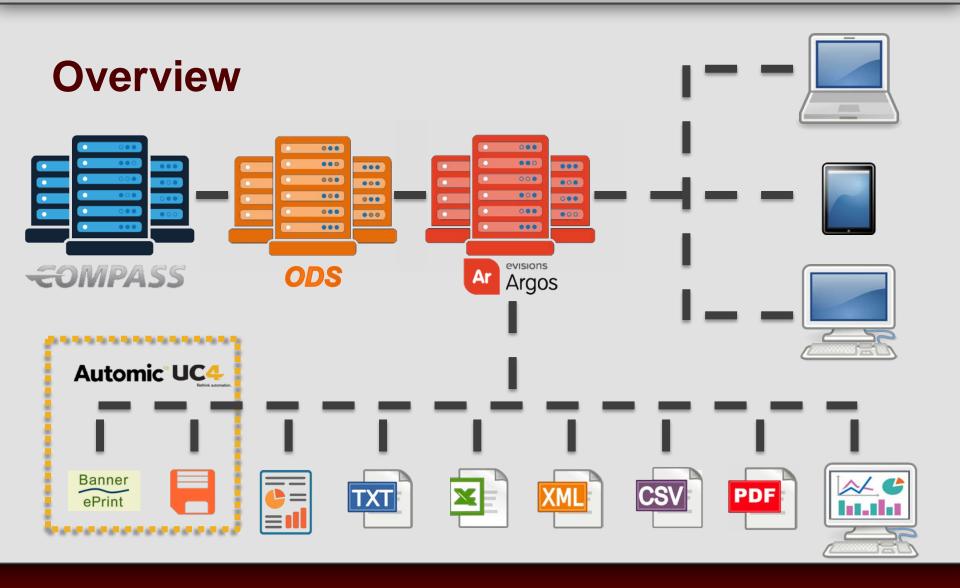

Operational Data Store (ODS)

- ODS is updated nightly
- Data may be up to 24 hours old
- ODS data is extracted from Compass
- DARS data is extracted from Compass and ODS

Compass Reporting

Howdy is the entry point into Argos

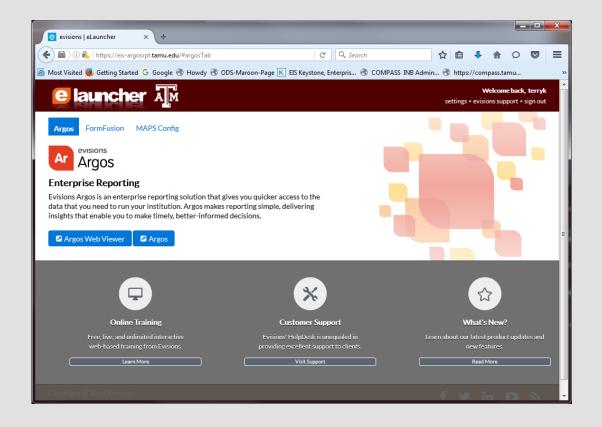

Argos eLauncher

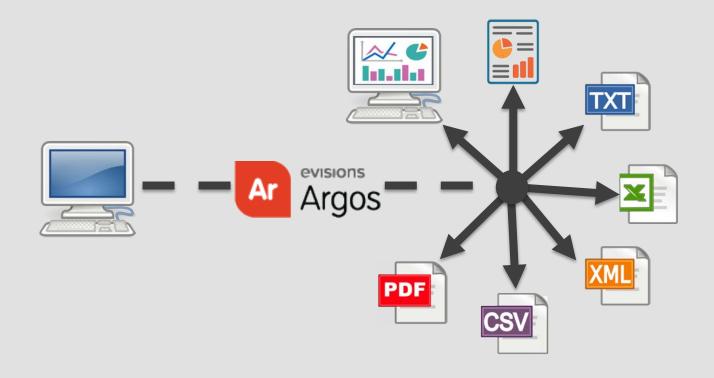

Click on the **Argos** button to Launch the Argos Reporting Tool

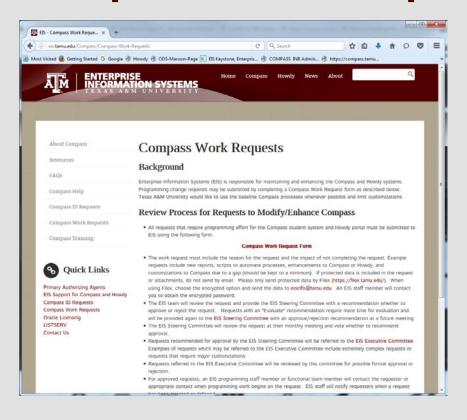

ARGOS meets your reporting needs

Compass Work Request

		EIS Compass W	ork Request	
Department! College: Phone/E-mail Strief description of requests Please be as specific as possible. Requests submitted due to an error must include a full description of he server and intended outcome after correcting the error. Attach forms or reports if possible, or additional pages, to assist with the request. Identify benefits of the request must state the impact (both fiscal and legal) of NOT completing the request, and the processes. Attach additional pages as necessary. Functional Approval: If this request is approved, EIS will need to obtain verification from the requesting department that the requesting alternative processes. Attach additional pages as necessary. Functional Approval: If this request is approved, EIS will need to obtain verification from the requesting department attaches reparamenting charges implemented by EIS meet the requirements of this request. This verification of functionally is called "functional approval" EIS will need to obtain this functional approval prior to installing the program in production.
